---

## Professional Summary

Founder & Full-Stack Software Engineer with 3+ years of experience designing and delivering scalable SaaS applications across the full development stack. Currently leading all product and engineering efforts at TechStride LLC, a career development platform for tech professionals. Skilled in React, Node.js, TypeScript, and cloud infrastructure (AWS), with expertise in building modular, secure systems and managing cross-functional product lifecycles. Thrive in startup environments, driving projects from concept to deployment while maintaining clean code practices, team mentorship, and Agile workflows. Remote-first and highly effective in distributed, asynchronous teams.

## Technical Skills

**Languages & Frameworks:** TypeScript, JavaScript (ES6+), Node.js, Express.js, React.js, Next.js, HTML5, CSS3, TailwindCSS, SASS

**Backend & APIs:** REST APIs, GraphQL (familiar), PostgreSQL, MongoDB, JWT Authentication, SaaS Platform Design

**Frontend Development:** Component-Based Architecture, UX/UI Optimization, Design System Integration, Responsive Design

**Cloud & DevOps:** AWS (Lambda, S3, EC2, RDS), Docker, GitHub Actions (familiar), Terraform (familiar)

**Testing & Best Practices:** Unit Testing (Jest), TDD, Clean Code Practices, Code Reviews

**Teamwork & Workflow:** Agile (Scrum), Jira, Git, Sprint Planning, Remote Collaboration, Technical Mentoring

## Professional Experience

---

### TechStride LLC, Atlanta, GA

April 2025 –Present

#### Founder & CTO

Founded and lead the development of TechStride, a SaaS career planning platform designed for tech professionals.

Oversee all product and engineering decisions, infrastructure, and iteration cycles in an early-stage startup environment.

- Architected and deployed a full-stack web application using Next.js, Express, MongoDB, and PostgreSQL, hosted on Vercel (Next.js Frontend) and Azure Web App (Backend API).
- Designed and implemented CI/CD pipelines, VPC security rules, and managed OAuth-based authentication with Auth.js.
- Built core features including user roadmap tracking, milestone planning, interactive dashboards, and markdown-powered updates.
- Integrated Stripe for subscription handling and structured payment plans.
- Conducted market research, UX testing, and roadmap planning with early users.
- Operate as the sole technical founder with business registration and LLC setup complete; not yet compensated due to bootstrapped nature.

### Bizinc LLC, Atlanta, GA

Oct 2023–Present

#### Senior Software Developer (May 2024 - Present)

#### Software Developer (Jan 2024 - May 2024)

#### Software Developer Intern (Oct 2023 - Jan 2024)

- Developed features across a full-stack SaaS platform used by business clients, supporting account management, billing, and media delivery.
- Delivered secure, performant frontend components with React and TypeScript, integrated into a shared design system.
- Built and maintained RESTful APIs and microservices using Node.js, Express, and PostgreSQL; explored GraphQL for future modular integrations.
- Led the integration of Stripe billing, syncing customer and transaction data across the app and database.
- Designed and launched a CDN-based image pipeline with instant UI updates and long-term caching for uploaded assets.
- Wrote unit tests using Jest and supported team-wide testing practices through pair programming and code reviews.
- Collaborated with fully distributed teams across time zones using Agile Scrum; contributed to retrospectives, planning, and onboarding.

### EVOfit Fitness, Smyrna, GA

Sept 2021 - Sept 2023

#### IT Manager

- Built responsive web dashboards and tools to automate reporting and track business metrics.

- Designed cross-platform internal web apps using HTML/CSS/JS with API integrations for real-time data sync.
- Maintained and optimized infrastructure for performance, availability, and reporting accuracy.

## Education

---

University of Phoenix, Phoenix, AZ

**BACHELOR OF SCIENCE IN COMPUTER SCIENCE (B.S.C.S)**

## Certifications

---

**AWS Certified Solutions Architect - Associate** (1LMSZKL17EQ11WSH)

2023-09-15 to 2026-09-15

**AWS Certified Cloud Practitioner** (PP1YD6J252B4QXWS)

2022-12-16 to 2026-09-15

## Software Development Related Projects

---

**Internal Task Tracker** — Angular, MongoDB, REST API Built a responsive web application to track team deliverables. Features included authentication, dynamic task filtering, and component-based UI.

**E-commerce Platform for Gaming Retailer** — Next.js, PostgreSQL Created a scalable e-commerce web app with secure session management, product integrations using IGDB API, and a custom shopping cart flow.
